

This week:

1. First, I revise the paper according to professor's letter. Including grammar and compile.
2. It takes one day to Change VAUD to TVCG version.
3. Add the compare panel to system.
4. Add the information panel to system.
5. Discuss idea with xiaoming and zongzhuang. There are two idea to discuss. One is analysis the social network of group. A group is clustered using social network data. Other is that we discuss the feasibility to combine VAUD and ontology. Most ideas are around optimization of node diagram, privacy protection, clustering and ways to explore.
6. Discuss the panel design with huihua. We determine style of two panel above.
7. Coding the panel including function and css.
8. Read the recording of smart Grid.

Next week:

26: video

27: cover letter

28: final revise

29: submit
